CITI Program

If you are not already logged into UA NetID WebAuth system, you may be prompted to do so.

Enter your UA NetID and Password, then click on “Login” button.

If you do not already have a CITI Program profile, you will be prompted to create one. Using the UA SSO link will help to affiliate your profile with UA in order to access the courses that are available to all UA Members.

If you already have a CITI Program profile established, you will be taken to the Main Menu page.
From the main menu page, select the “Export Compliance (EC)” link.

If the “Export Compliance” link does not already appear – click on the “Add a Course” to add this series to your Main Menu page. (Follow the instructions provided by CITI).
After clicking on the “Export Compliance” link from the main menu page, you will see all the modules available in the Export Compliance series.

Those on a Technology Control Plan (TCP) are required to take the “Required Modules” listed.

The “Supplemental Modules” are available for all UA Members, but are not required.

If you would like to know which of these modules may be beneficial to you in your role, please contact UECP (export@email.Arizona.edu) for guidance.
